1 Background

(a) Organisation and operations

Ardshinbank OJSC (the "Bank") was established in the Republic of Armenia as a closed joint stock company in 2003.

Since November 25, 2025, the closed joint-stock company "Ardshinbank" has been transformed into an open joint-stock company and continues its activities under the name Open Joint-Stock Company "Ardshinbank" (OJSC "Ardshinbank").

The principal activities are deposit taking, customer accounts maintenance, credit operations, issuing guarantees, cash and settlement transactions and securities and foreign exchange transactions. The Bank's activities are regulated by the Central Bank of Armenia (CBA). The Bank has a general banking license and is a member of the state deposit insurance system in the Republic of Armenia.

The Bank has 72 branches (as of 31 December 2025: 71 branches) from which it conducts business throughout the Republic of Armenia. The registered address of the head office is 13 Grigor Lusavorich Street, Yerevan, Republic of Armenia. The majority of the Bank's assets and liabilities are located in the Republic of Armenia.

Pursuant to the laws of Armenia and the Bank Charter, the control and management of the Bank is divided among the shareholders, the Board of Directors and the Management Board, which is the collective executive body, and the Chairman of the Management Board, who is the sole individual executive body. The shareholders function as the ultimate governing body of the Bank and have the exclusive authority to approve certain material decisions.

The Bank's parent company is Arins Group LLC, which is controlled by a single individual, Karen Safaryan, who is also the Chairman of the Board of Directors of the Bank.

(b) Armenian business environment

The Bank's operations are primarily located in Armenia. Consequently, the Bank is exposed to the economic and financial markets of Armenia which display characteristics of an emerging market. The legal, tax and regulatory frameworks continue development, but are subject to varying interpretations and frequent changes which together with other legal and fiscal impediments contribute to the challenges faced by entities operating in Armenia.

In February 2022, because of the military conflict between the Russian Federation and Ukraine, a number of countries imposed sanctions against the Russian Federation. The conflict affects not only the economic activity of two countries but the global economy as well. As a result of sanctions, commodity and food prices have risen in many countries around the world, the established links between supply of resources have been disrupted, inflation also affects the prices, and analysts also forecast economic implications for the global industry.

The financial statements reflect management's assessment of the impact of the Armenian business environment on the operations and the financial position of the the Bank. The future business environment may differ from management's assessment.

2 Basis of accounting

(a) Statement of compliance

The interim financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Bank's annual financial statements as at 31 December 2025.

(b) Basis of measurement

The financial statements are prepared on the historical cost basis except that financial instrument at fair value through profit or loss and through other comprehensive income are stated at fair value and buildings are stated at revalued amounts.

(c) Functional and presentation currency

The functional currency of the Bank is the Armenian Dram (AMD) as, being the national currency of the Republic of Armenia, it reflects the economic substance of most underlying events and circumstances relevant to the Bank.

The AMD is also the presentation currency for the purposes of these interim financial statements. The official CBA exchange rates at 30 September 2026 and 31 December 2025 were AMD 362.83 and AMD 381.36 to USD 1, and AMD 412.14 and AMD 449.01 to EUR 1, respectively.

Financial information presented in AMD is rounded to the nearest thousand.

(d) Use of estimates and judgments

The judgements, estimates and assumptions made in preparation of these interim financial statements are in consistent with those made in the preparation of the Bank's annual financial statements for the year ended 31 December 2025. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

3 Significant accounting policies

The accounting policies adopted in the preparation of the interim financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended 31 December 2025. The Bank has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

One amendment applies for the first time in 2025, but does not have an impact on the interim financial statements of the Bank.

Lack of exchangeability - Amendments to IAS 21

The amendments to IAS 21 *The Effects of Changes in Foreign Exchange Rates* specify how an entity should assess whether a currency is exchangeable and how it should determine a spot exchange rate when exchangeability is lacking. The amendments also require disclosure of information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity's financial performance, financial position and cash flows.

The amendments are effective for annual reporting periods beginning on or after 1 January 2025. When applying the amendments, an entity cannot restate comparative information.

The amendments did not have a material impact on the Bank's financial statements.

The tables presented in the notes to the statement of profit or loss and other comprehensive income include cumulative information for the reporting quarter and the reporting year.

(a) Deferred tax assets and liabilities

Temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes give rise to net deferred tax liabilities as at 30 September 2026 and 31 December 2025. The deductible temporary differences do not expire under current tax legislation.

Movements in temporary differences during the quarter ended 30 September 2026 and 30 September 2025 are presented as follows:

AMD'000	01.01.2026	Recognised in profit or loss	Recognised in OCI	30.09.2026

Total investment securities at FVOCI	**77,281,837**	**80,196,344**

The Bank has transactions to sell securities under agreements to repurchase and to purchase securities under agreements to resell.

The securities sold under agreements to repurchase are transferred to a third party and the Bank receives cash in exchange. These financial assets may be repledged or resold by counterparties in the absence of default by the Bank, but the counterparty has an obligation to return the securities at the maturity of the contract. The Bank has determined that it retains substantially all the risks and rewards of these securities and therefore has not derecognised them. The cash received is recognised as a financial asset and a financial liability is recognised for the obligation to repay the purchase price for this collateral, and is included in deposits and balances from banks and other borrowings (note 17).

These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowing and lending activities.

12 Loans and advances to banks and financial institutions

	30/09/2026 AMD'000	31/12/2025 AMD'000
Reverse repurchase agreements with related financial institutions	254,082,955	49,377,505

Total gross loans and advances to banks and financial institutions	**562,599,527**	**320,721,177**
Credit loss allowance	**(167,782)**	**(276,029)**
Total net loans and advances to banks and financial institutions	**562,431,745**	**320,445,148**

None of loans and advances to banks and financial institutions are past due.

* Unsettled transactions include amounts transferred to a foreign counterparty for replenishment of a correspondent account which were cleared shortly after the year-end.

Balances with the Central Bank of Armenia include credit card settlement deposit, that is a non-interest-bearing deposit calculated in accordance with regulations issued by the Central Bank of Armenia and withdrawability of which is restricted.

Banks are required to maintain obligatory reserve with the Central Bank of Armenia for attracted funds. For funds attracted in AMD the obligatory reserve is 4% and is maintained fully in AMD. For funds attracted in foreign currencies, the reserve is 15% of the attracted funds. The Bank's ability to withdraw deposit maintained in AMD is not restricted by the statutory legislation; however, if the Bank fails to comply with minimum average monthly amount of reserve sanctions may apply. For the obligatory reserve maintained in foreign currencies the Bank is required to maintain a minimum balance at the end of each day. These reserves are not considered cash and cash equivalents and are included in loans and advances to banks.

Collateral accepted as security for assets

At 30 September 2026 the fair value of financial assets collateralizing reverse repurchase agreements is AMD 303,765,964 thousand (as at 31 December 2025: AMD 138,980,350 thousand). Bank has permission to sell or repledge financial assets, that are collateralized under reverse repurchase agreements.

These transactions are conducted under terms that are usual and customary to standard lending, and securities borrowing and lending activities.

Concentration of loans and advances to banks and financial institutions

As at 30 September 2026 the Bank has one financial institution except for the CBA (2025: has one financial institutions, except for the CBA), whose balance exceed 10% of equity. The gross value of this balance as at 30 September 2026 is AMD 253,207,795 (as at 31 December 2025: AMD 48,033,824 thousand)

13 Loans to customers

(i) Loans to corporate customers

Loans to corporate customers are subject to individual credit appraisal and impairment testing. The general creditworthiness of a corporate customer tends to be the most relevant indicator of credit quality of the loan extended to it. However, collateral provides additional security and the Bank generally requests corporate borrowers to provide it.

Management estimates that the fair value of collateral securing overdue or impaired loans to corporate customers is not less than the carrying amount of individual loans.

The Bank has loans, for which the fair value of collateral was assessed at the loan inception date and it was not updated for further changes. For certain loans the fair value of collateral is updated as at the reporting date. Information on the valuation of collateral is based on when this estimate was made, if any.

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Sureties received from individuals, such as shareholders of SME borrowers, are not considered for impairment assessment purposes. Accordingly, such loans and unsecured portions of partially secured exposures are presented as loans without collateral or other credit enhancement.

The recoverability of loans which are neither past due nor impaired primarily depends on the creditworthiness of borrowers rather than the value of collateral, and the Bank does not necessarily update the valuation of collateral as at each reporting date.

Management estimates that the fair value of collateral securing overdue or impaired loans to corporate customers is not less than the carrying amount of individual loans.

The Bank has loans, for which the fair value of collateral was assessed at the loan inception date and it was not updated for further changes. For certain loans the fair value of collateral is updated as at the reporting date. Information on the valuation of collateral is based on when this estimate was made, if any.

For loans secured by multiple types of collateral, collateral that is most relevant for impairment assessment is disclosed. Sureties received from individuals, such as shareholders of SME borrowers, are not considered for impairment assessment purposes. Accordingly, such loans and unsecured portions of partially secured exposures are presented as loans without collateral or other credit enhancement.

The recoverability of loans which are neither past due nor impaired primarily depends on the creditworthiness of borrowers rather than the value of collateral, and the Bank does not necessarily update the valuation of collateral as at each reporting date.

(ii) Loans to retail customers

Gold loans

Gold loans are secured by golden jewelry. The Bank's policy is to issue gold loans with a loan-to-value ratio at the date of loan issuance of a maximum of 600%.

Credit cards

Credit card loans are not secured.

Mortgage

Mortgage loans are secured by the underlying housing real estate. The Bank's policy is to issue mortgage loans with a loan-to-value ratio at the date of loan issuance of a maximum of 90%.

Agricultural loans

Agricultural loans are mainly unsecured.

Other loans

Other loans are mainly secured by real estate. The Bank's policy is to issue other loans with a loan-to-value ratio of maximum of 80%.

(iii) Repossessed collateral

As at 30 September 2026 and 31 December 2025, the repossessed collateral comprises:

	30/09/2026 AMD'000	31/12/2025 AMD'000
Real estate	5,779,557	4,689,864
Other assets	1,278,990	1,105,802
Total	**7,058,547**	**5,795,666**
Less: allowance for impairment	(1,576,138)	(1,578,506)
Total repossessed assets	**5,482,409**	**4,217,160**

Included in other repossessed collateral are gold items amounting to AMD 551,149 thousand as at 30 September 2026 (as at 31 December 2025: AMD 107,453 thousand).

On the date of foreclosure the collateral is measured at the carrying amount of the defaulted loan. Subsequent to foreclosure repossessed assets are measured at cost less impairment losses. Impairment is estimated based on the market approach. The market approach for real estate is based upon an analysis of the results of comparable recent sales of similar assets or announced prices for sale of similar assets, applying a discount of between 20% and 40% depending on the nature and location of the asset for the announced prices for sale.

The Bank's policy is to sell these assets as soon as it is practicable.

(d) Industry and geographical analysis of the loan portfolio

Loans to customers measured at amortised cost were issued primarily to customers located within the Republic of Armenia who operate in the following economic sectors:

	30/09/2026 AMD'000	31/12/2025 AMD'000
Energy	102,594,043	101,891,307

(e) Loan maturities

The maturity of the loan portfolio is presented in note 23(e), which shows the remaining period from the reporting date to the contractual maturity of the loans. Due to the short-term nature of the loans issued by the Bank, it is likely that many of the loans will be renewed at maturity. Accordingly, the effective maturity of the loan portfolio may be significantly longer than the contractually agreed term.

22 Share capital and reserves

(a) Issued capital and share premium

As of 30 September 2026 the issued and outstanding share capital comprises 1,500,000 ordinary shares (as of 31 December 2025: 1,500,000) and 500,000 convertible preferred shares (as of 31 December 2025: 500,000). All shares have a nominal value of AMD 100,000 (as of 31 December 2025: AMD 100,000). Consideration was all received by cash and included in the statement of cash flows.

(b) Nature and purpose of reserves

Revaluation surplus for land and buildings

The revaluation surplus for land and buildings comprises the cumulative positive revalued value of land and buildings, until the assets are derecognised or impaired.

Revaluation reserve for financial assets at fair value through other comprehensive income

The revaluation reserve for financial assets at fair value through other comprehensive income comprises the cumulative net change in the fair value.

(c) Dividends

Dividends payable are restricted to the maximum retained earnings of the Bank, which are determined according to Armenian legislation.

The Bank declared and paid dividends amounting to AMD 134,201,250 thousand to its ordinary shareholders and AMD 3,586,928 thousand to its preferred shareholders. during the period ended September 30, 2026.
The Bank paid dividend in amount AMD 137,671,328 thousand which was used to replenish the share capital during the period ended September 30, 2025

23. Risk management

(a) Risk management policies and procedures

Management of risk is fundamental to the business of banking and forms an essential element of the Bank's operations. The major risks faced by the Bank are those related to market risk, credit risk, liquidity risk and operational risks.

The risk management policies aim to identify, analyse and manage the risks faced by the Bank, to set appropriate risk limits and controls, and to continuously monitor risk levels and adherence to limits. Risk management policies and procedures are reviewed regularly to reflect changes in market conditions, products and services offered and emerging best practice.

The Board of the Bank has overall responsibility for the oversight of the risk management framework, overseeing the management of key risks and reviewing its risk management policies and procedures as well as approving significantly large exposures.

The Management Board is responsible for monitoring and implementation of risk mitigation measures and ensuring that the Bank operates within the established risk parameters. The Head of the Risk Management Department is responsible for the overall risk management and compliance functions, ensuring the implementation of common principles and methods for identifying, measuring, managing and reporting both financial and non-financial risks. He reports directly to the Chairman of Management Board and indirectly to the Board of the Bank.

Credit, market and liquidity risks both at the portfolio and transactional levels are managed and controlled through a system of Credit Committees and an Asset and Liability Management Committee (ALCO). In order to facilitate efficient and effective decision-making, the Bank established a hierarchy of credit committees depending on the type and amount of the exposure.

Both external and internal risk factors are identified and managed throughout the organisation. Particular attention is given to identifying the full range of risk factors and determining of the level of assurance over current risk mitigation procedures. Apart from the standard credit and market risk analysis, the Risk Department monitors financial and non-financial risks by holding regular meetings with operational units in order to obtain expert judgments in their respective areas of expertise.

In compliance with the Bank's internal documentation the Risk Department and internal audit function frequently prepare reports, which cover the Bank's significant risks management. The reports include observations as to assessment of the effectiveness of the Bank's procedures and methodologies, and recommendations for improvement.

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises currency risk, interest rate risk and other price risks. Market risk arises from open positions in interest rate and equity financial instruments, which are exposed to general and specific market movements and changes in the level of volatility of market prices and foreign currency rates. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Overall authority for market risk is vested in the Banks Risk Management Department. In terms of market risk management, the risk appetite is set by the Board, and the internal limits are set by the Board of Management.

The Bank manages its market risk by setting open position limits in relation to financial instruments, interest rate maturity and currency positions and stop-loss limits. These are monitored on a regular basis and reviewed and approved by the Management Board.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Bank is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its consolidated statement of financial position and cash flows. Interest margins may increase as a result of such changes but may also reduce or create losses in the event that unexpected movements occur.

Interest rate gap analysis

Interest rate risk is managed principally through monitoring interest rate gaps. A summary of the interest gap position for major financial instruments is as follows:

AMD '000	Less than 3 months	3-6 months	6-12 months	1-5 years	More than 5 years	Non-interest bearing	Carrying amount

Interest rate sensitivity analysis

The management of interest rate risk, based on an interest rate gap analysis, is supplemented by monitoring the sensitivity of financial assets and liabilities. An analysis of the sensitivity of net profit or loss and equity (net of taxes) to changes in interest rates (repricing risk), based on a simplified scenario of a 100 basis point (bp) symmetrical fall or rise in all yield curves and positions of interest-bearing assets and liabilities existing as at 30 September 2026 and 31 December 2025, is as follows:

	30/09/2026 AMD'000	31/12/2025 AMD'000
100 bp parallel fall	3,219,015	2,463,105
100 bp parallel rise	(3,219,015)	(2,463,105)

An analysis of the sensitivity of net profit or loss and equity as a result of changes in the fair value of financial instruments at fair value though profit or loss and financial assets at fair value through other comprehensive income due to changes in the interest rates, based on positions existing as at 30 September 2026 and 31 December 2025 and a simplified scenario of a 100 bp symmetrical fall or rise in all yield curves, is as follows:

	30/09/2026 AMD'000	31/12/2025 AMD'000
	Equity	Equity
100 bp parallel fall	1,975,169	2,328,608
100 bp parallel rise	(1,975,169)	(2,328,608)

(d) Currency risk

The Bank has assets and liabilities denominated in several foreign currencies. Currency risk is the risk that the fair value or the future cash flows of a financial instrument will fluctuate because of changes in foreign currency exchange rates. Although the Bank hedges its exposure to currency risk, such activities do not qualify as hedging relationships in accordance with IFRS.

The following table shows the foreign currency exposure structure of financial assets and liabilities as at 30 September 2026 and 31 December 2025.

	30/09/2026

Net position	**11,518,452**	**142,382**	**7,664,228**	**19,325,062**

A strengthening of the AMD against the above currencies at 30 September 2026 and at 31 December 2025 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remained constant.

	30/09/2026 AMD'000	**31/12/2025 AMD'000**
20% appreciation of USD against AMD	1,605,516	2,303,690
20% appreciation of EUR against AMD	949,784	28,476

(e) Credit risk

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The Bank has policies and procedures in place to manage credit exposures (both for recognised financial assets and unrecognised contractual commitments), including guidelines to limit portfolio concentration and the establishment of a Credit Committee to actively monitor credit risk. The credit policy is reviewed and approved by the Management Board.
The credit policy establishes:

• procedures for reviewing and approving loan credit applications
• methodology for the credit assessment of borrowers (corporate and retail)
• methodology for the credit assessment of counterparties, issuers and insurance companies
• methodology for the evaluation of collateral
• credit documentation requirements
• procedures for the ongoing monitoring of loans and other credit exposures.

Corporate loan credit applications are originated by the relevant client managers and are then passed on to the Loan Department, which is responsible for the corporate loan portfolio. Analysis reports are based on a structured analysis, focusing on the customer's business and financial performance. The loan credit application and the report are then independently reviewed by the Credit Risk Management Department and a second opinion is given accompanied by a verification that credit policy requirements are met. The Credit Committee reviews the loan credit application based on submissions by the Loan Department and the Credit Risk Management Department. Individual transactions are also reviewed by the Legal, Accounting and Tax departments, depending on the specific risks and pending final approval of the Credit Committee.

The Bank continuously monitors the performance of individual credit exposures and regularly reassesses the creditworthiness of its customers. The review is based on the customer's most recent financial statements and other information submitted by the borrower, or otherwise obtained by the Bank. Retail loan credit applications are reviewed by the Retail Lending Department through the use of scoring models and application data verification procedures developed together with the Risk Department.

Apart from individual customer analysis, the credit portfolio is assessed by the Risk Department with regard to credit concentration and market risks.

The maximum exposure to credit risk is generally reflected in the carrying amounts of financial assets in the statement of financial position and unrecognised contractual commitment amounts. The impact of the possible netting of assets and liabilities to reduce potential credit exposure is not significant.

The maximum exposure to credit risk from financial assets at the reporting date is as follows:

	30/09/2026	31/12/2025
	AMD'000	AMD'000
ASSETS		
Cash and cash equivalents, except for cash on hand	301,837,775	386,230,441
Loans and advances to banks	562,431,745	320,445,148
Loans to customers	1,782,794,492	1,464,143,122
Investment securities	315,251,099	436,231,416
Other financial assets	2,146,062	1,718,680
Total maximum exposure	**2,964,461,174**	**2,608,768,807**

Collateral generally is not held against claims under derivative financial instruments, investments in securities, and loans and advances to banks, except when securities are held as part of reverse repurchase and securities borrowing activities.

For the analysis of collateral held against loans to customers and concentration of credit risk in respect of loans to customers refer to note 13.

The maximum exposure to credit risk from unrecognised contractual commitments at the reporting date is presented in note 24.

Offsetting financial assets and financial liabilities

The disclosures set out in the tables below include financial assets and financial liabilities that:

• are offset in the Bank's statement of financial position or
• are subject to an enforceable master netting arrangement or similar agreement that covers similar financial instruments, irrespective of whether they are offset in the statement of financial position.

Similar agreements include derivative clearing agreements, global master repurchase agreements, and global master securities lending agreements. Similar financial instruments include derivatives, sales and repurchase agreements, reverse sale and repurchase agreements and securities borrowing and lending agreements. Financial instruments such as loans and deposits are not disclosed in the table below unless they are offset in the statement of financial position.

The Bank receives and gives collateral in the form of marketable securities in respect of sale and repurchase, and reverse sale and repurchase agreements.

Such collateral is subject to the standard industry terms. This means that securities received/given as collateral can be pledged or sold during the term of the transaction but must be returned on maturity of the transaction. The terms also give each counterparty the right to terminate the related transactions upon the counterparty's failure to post collateral.

The above arrangements do not meet the offsetting criteria in the statement of financial position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the Bank or the counterparties.
The table below shows financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar arrangements.

AMD'000

Types of financial assets/liabilities	Gross amounts of recognised financial asset/liability	Gross amount of recognized financial liability/asset offset in the statement of financial position	Net amount of financial assets/liabilities presented in the statement of financial position	Related amounts not offset in the statement of financial position		
				Financial instruments	Cash collateral received	Net amount
Amounts receivable under reverse repurchase agreements	299,213,059	-	299,213,059	(299,213,059)	-	-
Total financial assets	**299,213,059**	**-**	**299,213,059**	**(299,213,059)**	**-**	**-**
Amounts payable under repurchase agreements	(76,013,080)	-	(76,013,080)	76,013,080	-	-
Total financial liabilities	**(76,013,080)**	**-**	**(76,013,080)**	**76,013,080**	**-**	**-**

AMD'000

Types of financial assets/liabilities	Gross amounts of recognised financial asset/liability	Gross amount of recognized financial liability/asset offset in the statement of financial position	Net amount of financial assets/liabilities presented in the statement of financial position	Related amounts not offset in the statement of financial position		
				Financial instruments	Cash collateral received	Net amount
Amounts receivable under reverse repurchase agreements	130,695,619	-	130,695,619	(130,695,619)	-	-
Total financial assets	**130,695,619**	**-**	**130,695,619**	**(130,695,619)**	**-**	**-**
Amounts payable under repurchase agreements	(242,691,430)	-	(242,691,430)	242,691,430	-	-
Total financial liabilities	**(242,691,430)**	**-**	**(242,691,430)**	**242,691,430**	**-**	**-**

The gross amounts of financial assets and financial liabilities and their net amounts as presented in the statement of financial position that are disclosed in the above tables are measured in the statement of financial position on the amortized cost basis.

(f) Liquidity risk

Liquidity risk is the risk that the Bank will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. Liquidity risk exists when the maturities of assets and liabilities do not match. The matching and/-or controlled mismatching of the maturities and interest rates of assets and liabilities is fundamental to liquidity management. It is unusual for financial institutions ever to be completely matched, since business transacted is often of an uncertain term and of different types. An unmatched position potentially enhances profitability but can also increase the risk of losses.

The Bank maintains liquidity management with the objective of ensuring that funds will be available at all times to honour all cash flow obligations as they become due. The liquidity policy is approved by the Board and its management by the Management Board.

The Bank seeks to actively support a diversified and stable funding base comprising debt securities in issue, long- and short-term loans from other Banks, core corporate and retail customer deposits, accompanied by diversified portfolios of highly liquid assets, in order to be able to respond quickly and efficiently to unforeseen liquidity requirements.

The liquidity management policy requires:

• projecting cash flows by major currencies and taking into account the level of liquid assets necessary in relation thereto;
• maintaining a diverse range of funding sources;
• managing the concentration and profile of debts;
• maintaining debt financing plans;
• maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any interruption to cash flow;
• maintaining liquidity and funding contingency plans;
• monitoring liquidity ratios against regulatory requirements.

The Treasury Department receives information from business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. The Treasury Department then provides for an adequate portfolio of short-term liquid assets to be maintained, largely made up of short-term liquid trading securities, loans to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole. The liquidity position is monitored and regular liquidity stress testing under a variety of scenarios covering both normal and more severe market conditions, is performed by the Treasury Department. Under normal market conditions, liquidity reports covering the liquidity position are presented to senior management on a weekly basis. Decisions on liquidity management are made by the ALCO and implemented by the Risk Department.

The following tables show the undiscounted cash flows on financial liabilities and credit-related commitments on the basis of their earliest possible contractual maturity. The total gross inflow and outflow disclosed in the tables is the contractual, undiscounted cash flow on the financial liability or credit related commitment. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee can be called.

The table below shows an analysis of assets and liabilities according to when they are expected to be recovered or settled as at 30 June 2026:

AMD'000	Demand and less than 1 month	From 1 to 3 months	From 3 to 12 months	From 1 to 5 years	More than 5 years	No maturity	Overdue	Total

*The amounts included in the overdue band in the above tables represent only the overdue portions of the total overdue assets and liabilities.

For management of negative short-term liquidity position the Bank relies on the financial securities, which can be sold or pledged under repo agreements and the assumption that the term deposits will be prolonged upon maturity.

The main benchmark used by the Bank for liquidity risk management is the ratio of highly liquid assets to net cash outflow, as well as Net stable funding indicators.

24 Credit related commitments

The Bank has outstanding credit related commitments to extend loans. These credit related commitments take the form of approved loans and credit card limits and overdraft facilities.

The Bank provides financial guarantees and letters of credit to guarantee the performance of customers to third parties. These agreements have fixed limits and generally extend for a period of up to five years.

The Bank applies the same credit risk management policies and procedures when granting credit commitments, financial guarantees and letters of credit as it does for granting loans and advances to customers.

The contractual amounts of credit related commitments are set out in the following table by category.

The amounts reflected in the table for credit related commitments assume that amounts are fully advanced. The amounts reflected in the table for guarantees and letters of credit represent the maximum accounting loss that would be recognised at the reporting date if the counterparties failed completely to perform as contracted.

	30/09/2026 AMD'000	30/09/2026 AMD'000
Contracted amount		
Loan and credit line commitments	107,227,488	85,285,283

Guarantees and letters of credit	81,917,798	87,045,758
	227,809,185	**195,451,640**

The total outstanding contractual credit related commitments above do not necessarily represent future cash requirements, as these credit related commitments may expire or terminate without being funded. The majority of loan and credit line commitments do not represent an unconditional credit related commitment by the Bank.

25 Contingencies

(a) Litigation

In the ordinary course of business, the Bank is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial condition or the results of future operations.

(b) Taxation contingencies

The taxation system in Armenia is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are sometimes unclear, contradictory and subject to varying interpretation. Taxes are subject to review and investigation by tax authorities, which have the authority to impose fines and penalties. In the event of a breach of tax legislation, no liabilities for additional taxes, fines or penalties may be imposed by tax authorities once three years have elapsed from the date of the breach.

These circumstances may create tax risks in Armenia that are more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Armenian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these financial statements, if the authorities were successful in enforcing their interpretations, could be significant.

26 Related party transactions

(a) Control relationships

The Bank's parent company is Arins Group LLC, which is controlled by a single individual, Karen Safaryan, who is also the Chairman of the Board of Directors of the Bank.

(b) Transactions with members of the Board of Directors and the Management Board

Total remuneration included in personnel expenses for the period ended 30 September 2026 and 30 September 2025 follows:

	01/07/2026 - 30/09/2026 AMD'000	01/01/2026 - 30/09/2026 AMD'000	01/07/2025 - 30/09/2025 AMD'000	01/01/2025 - 30/09/2025 AMD'000
Salary and bonuses	5,610,320	15,750,493	5,408,824	14,645,217

These amounts include cash and non-cash benefits in respect of members of the Board of Directors and the Management Board.

The outstanding balances as at 30 September 2026 and 31 December 2025 for transactions with members of the Board and the Management Board are as follows:

	30/09/2026 AMD'000	31/12/2025 AMD'000
Statement of financial position		
Amounts receivable from reverse repurchase agreement	-	-
Allowance on amounts receivable from reverse repurchase agreement	-	-
Loans to customers, gross	516,633	255,340
Allowance for loan impairment	*(4,859)*	*(6,701)*
Other assets	81	48
Current accounts and deposits from customers	3,485,223	3,033,773
Other liabilities	-	-
Items not recognised in the consolidated statement of financial position	-	-
Lending commitments	237,043	337,546
Guarantees given	-	-

Amounts included in profit or loss in relation to transactions with the members of the Board of and the Management Board for the period 30 September 2026 and 30 September 2025 are as follows:

	01/01/2026 - 30/09/2026 AMD'000	01/01/2025 - 30/09/2025 AMD'000
Profit or loss		
Interest income	30,006	21,836
Interest expense	(121,305)	(141,457)
Fee and commission income	13,004	8,547
Fee and commission expense	(6,559)	(7,851)

(c) Transactions with other related parties

Other related parties are entities under common control with the Bank, being entities ultimately controlled by Karen Safaryan, and close members of the families of and entities controlled by members of the Board of Directors and members of the Management Board. The outstanding balances as at 30 September 2026 and related profit or loss amounts of transactions for the period ended 30 September 2026 with other related parties are as follows:

	Parent	Entities under common control	Other
	AMD'000	AMD'000	AMD'000
Statement of financial position			
ASSETS			
Amounts receivable from reverse repurchase agreement	-	254,082,955	-
Allowance on amounts receivable under reverse	-	*(2,442)*	-
Loans to customers, gross	-	21,395	83,777
Allowance for loan impairment	-	*(177)*	*(1,349)*
Other assets	-	348,938	-
LIABILITIES			
Current accounts and deposits from customers	12,828,567	148,989,172	559,516
Other liabilities	-	351,962	-
Items not recognised in the statement of financial position			
Lending commitments	-	210,000	98,877
Guarantees given	-	95,125	-
Profit (loss)			
Interest income	1,651	3,629,764	4,996
Interest expense	(16,524)	(80,320)	(23,898)
Commission and other fees income	1,191,139	195,230	2,614
Commission and other fees expense	(20,000)	(5)	(3,641)
General administrative expenses	-	(635,220)	-

Amounts receivable from reverse repurchase agreement doesn't care risk exposure with local currency. Only RA government bonds are considered as collateral for reverse repo transactions.

The outstanding balances as at 31 December 2025 and related profit or loss amounts of transactions for the period ended 30 September 2025 with other related parties are as follows:

	Parent	Entities under common control	Other
	AMD'000	AMD'000	AMD'000

Fee and commission income	11,560	79,529	2,144
Fee and commission expense	-	(7)	(2,312)
General administrative expenses	-	(575,400)	-

27 Fair values of financial instruments

The Bank measures fair values using the following fair value hierarchy which reflects the significance of the inputs used in making the measurements:

• Level 1: quoted market price (unadjusted) in an active market for an identical instrument.

• Level 2: inputs other than quotes prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

• Level 3: inputs that are unobservable. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

As at 30 September 2026 the estimated fair values of all financial instruments except for debt securities issued and unquoted equity securities at fair value through other comprehensive income (2025: except unquoted equity securities at fair value through other comprehensive income) approximate their carrying amounts. As at 30 September 2026 the fair value of unquoted equity securities at fair value through other comprehensive income with a carrying value of AMD 779,445 thousand (as at 31 December 2025: AMD 653,157 thousand) could not be determined. There is no market for these investments and there have not been any recent transactions that provide evidence of the current fair value.

The table below analyses financial instruments measured at fair value at 30 September 2026 , by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognised in the statement of financial position:

AMD '000	Level 1	Level 2	Level 3	Total
Debt investment securities at FVTPL	-	-	-	-
Debt investment securities at FVOCI	1,672,234	74,830,159	-	76,502,393
Loans to customers at FVTPL	-	-	10,101,016	10,101,016
Corporate shares	-	-	779,445	779,445
Derivative assets	-	157,016	-	157,016
Derivative liabilities	-	1,232,017	-	1,232,017

The table below analyses financial instruments measured at fair value at 31 December 2025, by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognised in the statement of financial position:

AMD '000	**Level 1**	**Level 2**	**Level 3**	**Total**
Debt investment securities at FVTPL	-	-	-	-
Debt investment securities at FVOCI	1,128,055	78,415,132	-	79,543,187
Loans to customers at FVTPL	-	-	10,450,841	10,450,841
Corporate shares	-	-	653,157	653,157
Derivative assets	-	168,674	-	168,674
Derivative liabilities	-	138,055	-	138,055

The estimates of fair value are intended to approximate the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. However given the uncertainties and the use of subjective judgment, the fair value should not be interpreted as being realizable in an immediate sale of the assets or transfer of liabilities.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premiums used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.
